Dermatology Market Opportunities in ASEAN Market

According to the background information and current trends in the ASEAN market, the main areas of demand and growth identified are the following:

- **Melasma and hyperpigmentation:** Strong demand for scientifically-backed solutions that unify skin tone and reduce sun- and age-related pigmentation.
- **Acne and oily skin:** Growing interest in targeted therapies addressing active lesions, post-inflammatory marks, and effective sebum-regulation to prevent future breakouts.
- **Antiaging and wrinkles:** Expanded focus on treatments that support cellular repair and help improve firmness, elasticity, and visible signs of aging.
- **Dermal recovery:** Rising interest in treatments that accelerate skin repair and restore barrier, especially essential for post-procedure recovery following in-cabin treatments.
- **Sensitive Skin:** Strong demand for formulations that soothe, calm, and reinforce the skin barrier.

T7

In-cabin products

Melanyc Powder

- **Medium peel.**
- **Key Active Ingredients:** Hexyl-R, Arbutin, Kojic Acid, Mandelic and Salicylic acid.
- **Indication:** Skin depigmentation for mild spots and melasma.

Global Peel Solution

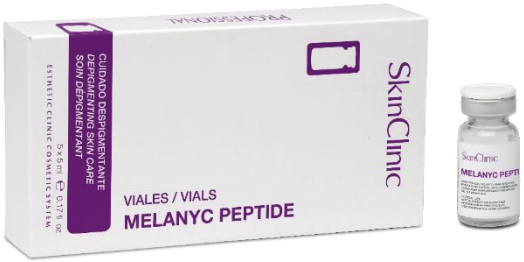
- **Intense** and more aggressive **peel**.
- **Key Active Ingredients:** Kojic Acid, Tranexamic Acid, Ferulic Acid, Ascorbic Acid…
- **Indicaction:** Melasma, post-inflammatory hyperpigmentation (PIH), dull skin tone.

Melanyc Clay K

- **Dermal renewal without causing peeling.** It can be used as an in-clinic protocol to prepare the skin in sessions prior to more intensive treatments.
- **Indication:** Gentle depigmenting peel, pH4.
- **Key Active Ingredients:** Citric, Salicylic, Kojic, Glycolic and Lactic Excipient pH4.

Depigmenting and Brightening vials for cabin use

Melanyc Peptide



- **Key Active Ingredients:** Vitamin C, Glutathione Niacinamide, Retinol and Vitamin E etc…
- **Mechanism of Action:** Depigmenting vial with biomimetic peptides designed to treat spots and dyschromia, including darkening in the under-eye area and facial pigmentation, helping to unify skin tone.
- **Clinical Indications:** Melasma, post-inflammatory hyperpigmentation, and hyperpigmented dark circles.

Vitamin C 20%

- **Key Active Ingredients:** Vitamin C, Glutathione Niacinamide, Retinol and Vitamin E etc…
- **Mechanism of Action:** igh concentration of Vitamin C at pH 7 with powerful antioxidant and anti-free radicals action. Due to its anti-tyrosine activity it also works to inhibit the effects of melanogenesis and prevents skin melasma.
- **Clinical Indications:** Antioxidant, revitalising, clarifies and brightens the skin.

How do we adapt to IPL or other lasers?

1. Skin cleansing with **Cleansing Milk**.
2. Apply anesthesia if needed.
3. Spread the **Laser Gel** and begin the laser shots.
4. Remove any excess gel and apply the **Repairing Serum.**
5. Home-use:
    1. Morning: **Ferulast**
    2. Night: **Ferulast** + **Melanyc Daily/Melanyc**.

Domiciliary products

Melanyc

- **Key Active Ingredients:** Kojic, Phytic and Glycolic Acid, Arbutin, Stable Vitamin C, Nicotinamide, Liquorice Extract and Chromabright®.
- **Mechanism of Action:** Night cream for melasma and hyperpigmentation combining inhibition of melanogenesis, epidermal renewal, and antioxidant activity.
- **Skin Type:** Normal, combination, oily, and non-sensitive skin.

Melanyc Daily

- **Key Active Ingredients:** Kojic, Phytic and Glycolic Acid, Arbutin, Nicotinamide, Liquorice Extract, Chromabright® and Hexyl-Resorcinol.
- **Mechanism of Action:** Daily cosmetic care for melasma and hyperpigmentation, especially for sensitive skin, focused on maintenance and prevention of recurrence.
- **Skin Type:** Dry and sensitive skin.

Domiciliary products

Melanyc Serum

- **Key Active Ingredients:** Arbutin, Hexyl-Resorcinol, Tranexamic Acid, Liquorice Extract, Ferulic Acid and Niacinamide.
- **Mechanism of Action:** Intensive serum that reduces existing spots, prevents new ones, evens skin tone, and softens fine lines with antioxidant and antiaging action.
- **Skin Type:** All skin types.

M Cream

- **Key Active Ingredients:** Natural Hydration Factor, Liposome, Soy Isoflavones, Lactokine®, Bioactive Polypeptides, Bifidobacteria Lysate, Aloe Vera, Active Bellis Perennis.
- **Mechanism of Action:** It inhibits melanogenesis, brightens hyperpigmented skin, enhances hydration, and promotes a more even complexion in fair and very fair skin tones, supporting effective daily cosmetic photoprotection in patients with dyschromia. Prevention of new hyperpigmented lesions in patients with melasma or lentigines.
- **Skin Type:** All skin types.

Melanyc Range

Product	Skin Type	Category	Indication
Melanyc	Normal, combination to oily skin	Pigmentation	Melasma and spots
Melanyc Daily	Dry and/or sensitive skin	Pigmentation	Melasma and spots
Melanyc Serum	All skin types	Pigmentation/ antiaging	Melasma, spots and wrinkles
Melanyc Eyes	All skin types	Pigmentation	Dark circles
M Cream	All skin types	Pigmentation	Prevention and maintenance
M Cream Night	All skin types	Pigmentation	Prevention and maintenance (night)
M Cream Colour	All skin types	Pigmentation	Prevention and maintenance with colour

Domiciliary products: Before-and-after Case

Results obtained through Visia analysis after 6 months of daily use.

Domiciliary serums with Vitamin C

Glow Oil

- **Key Active Ingredients:** Vitamin C 3%, Vitamin E, Revinage ®, Collageneer ®...
- **Mechanism of Action:** Provides hydro-nutrition and anti-wrinkle action. Promotes collagen synthesis and strengthens the skin barrier.
- **Skin Type:** Dry and sensitive skin.

Proteo C

- **Key Active Ingredients:** Stable vitamin C 4%, Phytoproteoglycanos ®, Ginko Biloba and DMAE.
- **Mechanism of Action:** Prevention and treatment of wrinkles, aging and skin pigmentation. Facial firming. Recovers dulll and fatigued skin.
- **Skin Type:** All skin types.

Ferulast

- **Key Active Ingredients:** Vitamin C, Ferulic Acid, Astaxanthin, Hyaluronic Acid and Vitamin E.
- **Mechanism of Action:** Antiaging, luminosity and reduction of expression wrinkles.
- **Skin Type:** All skin types.

Ferulast: Clinically Proven Efficacy

- Dual positioning: a beauty focus as an **antioxidant and an instant recovery solution** for the most damaged or irritated skin.
- **Advanced antioxidant protection:** delivering more effective inhibition of free radical damage thanks to ferulic acid, vitamin C and astaxanthin.
- It contains **astaxanthin**, the most powerful plant-derived antioxidant on the market according to clinical studies.
- A very complete product with the **extra hydration provided by hyaluronic acid**.
- **Immediate effect and strong recovery capacity**, even for severely damaged skin, making it the trusted reference product among aesthetic doctors.

In-cabin Products

Cream-Peel

- **Severe acne.**
- **Mechanism of action**: Dermal exfoliant that removes dead skin cells and cleanses the stratum corneum, smoothing the skin and leaving it soft, even, and bright.

Clay Cleanser

- **Moderate acne.**
- **Mechanism of action:** Micro-exfoliating mask/cleanser: purifies, mattifies, helps unclog pores, subtly brightens the skin tone, and improves the texture.

C-Powder

- **Mild acne.**
- **Mechanism of action:** Micro-exfoliation, antibacterial effect, and tone-brightening, with improved luminosity and texture.

Cabin-use Products

Professional Products:

- Cream peel, Clay Cleanser, C-Powder
- **Dermal Renewal Solutions:** Azalyc Peel Solution
- Polymer Purifying Mask for oily skin.
- **Vials and ampoules:** Retinol 300, Centella Asiatica.

Cabin-use Products: Before-and-after Case

Results obtained through Visia analysis.

Cleansing and Toning products for oily and acne-prone skin

Balance Lotion

- **Key Active Ingredients:** Nicotinamide, Allantoin, Lactic Acid, Malic Acid, Citric Acid, Phytic Acid…
- **Mechanism of Action:** Liquid lotion applied after cleansing to regulate excess oil, visibly tighten pores, and improve texture. It prepares oily/combination skin to receive subsequent treatments, optimizing the penetration of active ingredients.

Glicolyc Gel Clean

- **Key Active Ingredients:** Glycoin®, Collagen, Stabilized Vitamin C, Mimosa, Florasun®…
- **Mechanism of Action:** Oil-free cleansing gel, with a pH of approximately 4.5, combining cleansing action with a mild keratolytic effect. It helps balance the pH of acne-prone skin, removes sebum and impurities, and improves texture and radiance.

Domiciliary products for acne

Regulacne

- **Severe acne.**
- **Key Active Ingredients:** Stable Vitamin C, niacinamide, bioactive peptide, glucoside, and other organic peeling acids…
- **Clinical Indication:** Severe acne with excess sebum.

Glicosyl

- **Moderate acne.**
- **Key Active Ingredients:** Glycolic acid, salicylic acid, hyaluronic acid, alpha-bisabolol, proteoglycans, oil-free gel base…
- **Clinical Indications:** Oily skin with moderate acne, uneven texture, and marks.

Helixyl

- **Post-acne scars.**
- **Key Active Ingredients:** Purified Helix aspersa extract, African kigelia, mimosa, bisabolol, calendula, oil-free base…
- **Clinical Indications:** Oily skin with post-acne scars or pigmentation. Maintenance phase after outbreak control.

Domiciliary products for oily skin

Zalyc Serum

- **Key Active Ingredients:** Azelaic acid, salicylic acid, zinc, niacinamide, and lily extract.
- **Mechanism of Action:** Anti-aging serum that neutralizes free radicals, reduces inflammation in lesions, and helps prevent post-acne marks. It also regulates sebum by purifying the skin, controlling shine, and visibly refining pores.

Vita-C8

- **Key Active Ingredients:** 8% Stable Vitamin C, Jojoba, and Moringa.
- **Mechanism of Action:** Provides strong sebum-regulating activity (8% Vitamin C). Delivers an exfoliating effect, enhances luminosity, and evens out skin tone.

Acne Range

Product	Skin Type	Category	Indication
Regulacne	Oily/acne-prone skin	Acne	Severe acne
Glicosyl	Oily/acne-prone skin	Acne	Moderate acne

Ampoules for cabin use

Retinol 300

- **Key Active Ingredients:** Retinol 300,000 IU.
- **Mechanism of Action:** It gradually softens wrinkles, improves tone, radiance, firmness and elasticity. It is involved in collagen synthesis and in cell renewal processes.
- **Clinical Indications:** Prevention and intensive care of photoaged and acne-prone skin.
- **Skin Type:** All skin types, specially oily skin.

Argireline

- **Key Active Ingredients:** Argireline® 10%.
- **Mechanism of Action:** Anti-wrinkle peptide par excellence. It reduces existing wrinkles and expression lines and also prevents the appearance of new ones, achieving softer and smoother skin.
- **Clinical Indications:** Reduces the depth of wrinkles and expression lines.
- **Skin Type:** All skin types.

Vials for cabin use

Anti-aging Peptide HA 1%

- **Key Active Ingredients:** HA 1%, Oligopeptides, Glutathione, 5 nucleotides, 6 vitamins, 13 amino acids, 4 minerals…
- **Mechanism of Action:** Provides anti-aging and anti-wrinkle care, hydration, nourishment, redensification, and enhanced nutrient absorption, improving all signs of aging.

Vit-hial

- **Key Active Ingredients:** HA 1%, Copper Tripeptide-1, Glutathione, 4 minerals, 14 amino acids, 9 vitamins and 5 nucleotides.
- **Mechanism of Action:** Acts as a revitalizing cocktail: intensive hydration, anti-aging redensification, restoration of ionic balance, improved radiance, tone, elasticity, and firmness, with powerful antioxidant action.

Cabin use products

Professional Products:

- **Vials and Ampoules:** Hial-DMAE, Eyes Peptide, Rutin-Coumarine, Exosomes Cockatil…
- **Dermal Renewal Solutions:** Global Peel Solution, , Glycolic Exfoliating Solution…
- **Technology Use**: DMAE Gel 15%, Virtual Syringe Gel, Antiaging Jet Solution…

Vials for cabin use

Results obtained through Visia analysis:

- **6 sessions: 3 with Anti-Aging Peptide 1% and 3 with Argireline.**
- **3 months**

Domiciliary products with retinol

Retinol One Million

- **Key Active Ingredients:** Retinyl Palmitate 1.700.000 UI, Vitamin E.
- **Mechanism of Action:** A dose-dependent serum that reduces wrinkles and expression lines, improves firmness and elasticity, enhances skin texture and radiance, evens out skin tone, and improves the appearance of acne scars/marks.
- **Skin Type:** All skin types.
- **1 drop = 0,3% retinol**

Retiplus

- **Key Active Ingredients:** Retinol, Ceramides, Isoflavones from Liposomed soybeans, Sweet Almond Oil, Moringa Lipids, Avocado Oil, Wheat Germ Oil, MPC Milk Peptide, Gatuline® In-Tense, Ectoin® and Vitamin C.
- **Mechanism of Action:** Nourishing night cream with intensive anti-wrinkle action, firming and redensifying effects, improved texture and radiance, and boosted cellular renewal.
- **Skin Type:** All skin types.
- **New formula with retinal.**

Domiciliary products for redensifying

Redensity

- **Key Active Ingredients:** Cellfie®, Effipulp®, Biomimetic Collagen, Very Low Molecular Weight Hyaluronic Acid, Matrixyl® Synthe'6 and Gatuline® In-tense.
- **Mechanism of Action:** Acts by redensifying the skin through actives that stimulate collagen synthesis, reinforce dermal structure, fill wrinkles, and restore volume in a non-invasive way.
- **Skin Type:** All skin types.

Redensity Serum

- **Key Active Ingredients:** Cellfie®, Effipulp®, Bio-Retinol, 4 Essential Ceramides, Biomimetic Collagen and Vegetal Squalane.
- **Mechanism of Action:** Redensifies the skin by stimulating collagen and lipofilling, improving hydration, dermal organization, and cellular regeneration.
- **Skin Type:** All skin types.

Antiaging Range

Product	Skin Type	Category	Indication
Retiplus	All skin type (non sensitive)	Antiaging	Wrinkles and acne scars
Retinol One Million	All skin types	Antiaging	Anti-wrinkle booster
Regenerating Antiaging Cream	Normal/dry	Antiaging	Wrinkles and dull skin
Antiaging Liposom Cream	Very dry	Antiaging	Wrinkles in mature skin
Activ-Plus Day Cream	Normal/dry	Antiaging	Intensive daytime anti-wrinkle
Activ-Plus Night Cream	Normal/dry	Antiaging	Intensive nighttime anti-wrinkle
Redensity	All skin types	Firming	Redensification
Redensity Serum	All skin types	Firming	Intensive redensification
Ovalift	Dry/very dry	Firming	Facial contour sagging
DMAE Cream	Normal/dry	Firming	Facial sagging
DMAE Cream Sun Protection	Normal/dry	Firming	Sagging with SPF
DMAE Flash Cream	All skin types	Firming	Immediate lifting effect
Proteo C	All skin types	Antiaging Serum	Radiance
Resfill Day	All skin types	Antiaging Serum	Wrinkles and radiance
Resfill Night	All skin types	Antiaging Serum	Deep Wrinkles
Glow Oil	Dry skin and/or sensitive	Antiaging Serum	Wrinkles and hydronutrition

Domiciliary and cabin products for Dermal Recovery

Ferulast

- **Key Active Ingredients:** Ferulic Acid, Astaxanthin, HA, Vitamin C and Vitamin E.
- **Clinical Indications:** Facial photoaging and antioxidant support for patients post-treatment.
- **Skin Type:** All skin types, including sensitive skin.

- **Key Active Ingredients:** Sweet Almond Oil, Calendula, Avocado Oil, Chamomile, Allantoin, Alpha-Bisabolol...
- **Clinical Indications:** Post-peel, post-hair removal, post-laser, scars, acne marks, burns, and irritations.
- **Skin Type:** All skin types, especially sensitive, atopic, or damaged skin.

Restoring Cream

Hialucos

- **Key Active Ingredients:** Very low molecular weight Hyaluronic Acid, high molecular weight Hyaluronic Acid.
- **Clinical Indications:** Hydration, post-peel, scars, burns, and irritations.
- **Skin Type:** All skin types, especially sensitive, atopic, or damaged skin.

Dermal Recovery Range

Available in both cabin and home-use formats.

Product	Skin Type	Category	Indication
Ferulast	All skin types, including sensitized skin	Dermal Recovery	Photoaging and cellular regeneration (home use)
Repairing Serum	All skin types, including sensitized skin	Dermal Recovery	Cellular regeneration and post-treatment recovery (cabin use)
Restoring Cream	All skin types, including sensitized skin	Dermal Recovery	Cellular regeneration and post-treatment recovery
Aloe Vera Gel 200%	All skin types	Dermal Recovery	Irritation relief and comfort
Hialucos	All skin types, including sensitized skin	Dermal Recovery	Intensive regeneration and post-treatment
Skin Cover	All skin types	Dermal Recovery	Barrier-effect protection
Arni-K Vitacream	All skin types	Dermal Recovery	Bruise prevention
Musk Rose Oil	All skin types	Dermal Recovery	Improvement of scars and marks

Cabin products for sensitive skin

Lactic Cleansing Solution

- **Key Active Ingredients:** Lactic Acid 50%. Excipient pH 4.
- **Mechanism of Action:** Professional cleansing and gentle micro-exfoliation solution specifically formulated for sensitive skin: exfoliates the stratum corneum, improves firmness and texture, and enhances hydration.
- **Clinical Indications:** Cleansing/micro-peeling for sensitive, dry, or thin skin (neck and décolleté).
- **Skin Type:** All skin types.
- **Azalyc Peel Solution for rosacea and acne-prone skin.**

Dexpanthenol

- **Key Active Ingredients:** Dexpanthenol 20%.
- **Mechanism of Action:** Dexpanthenol is a vitamin with powerful moisturizing activity. Reduces transepidermal water loss, achieving softer and more elastic skin. In addition, it has a soothing effect and accelerates cell renewall, repairing tissue and improving keratinization of skin and hair.
- **Skin Type:** All skin types

Cleansing and Toning products for sensitive skin

Refresh Toner

- **Key Active Ingredients:** Witch Hazel, Chamomille, Oat, Glycerin and Natural Hydrating Factor.
- **Mechanism of Action:** Fluid toner designed to hydrate, soothe, and decongest sensitive or reactive skin. It enhances comfort, reduces feelings of tightness, and helps restore balance after cleansing while respecting the skin barrier
- **Skin type:** Sensitive/rosacea skin.

Sensitive Cleanser

- **Key Active Ingredients:** Aloe Vera, Oat, Chamomile and Sweet Almond Oil.
- **Mechanism of Action:** Cream soap without harsh detergents, with a very light foam that cleanses while hydrating, soothing, and regenerating the skin.
- **Skin Type:** Dry/dehydrated skin and sensitive/rosacea skin.

Domiciliary products for Sensitive Skin and Rosacea

Rosanic Cream

- **Key Active Ingredients:** Tea Tree Oil, Microsilver BGTM, Rhamnosoft®, Wheat Germ Oil, Avocado and Almonds, Lipids of Moringa, Arnica, Ruscus, Ginkgo Biloba, Comfrey, Calendula, Aloe Vera, Mirtilo, Liquorice and Alpha-Bisabolol.
- **Mechanism of Action:** Cream that soothes, relieves, and protects skin with redness, rosacea, or couperose; it strengthens the vascular barrier, reduces both transient and persistent redness, and reinforces the skin barrier.
- **Clinical Indications:**
  - Mild to moderate rosácea.
  - Couperose, diffuse redness, skin reactive to temperature changes.
- **Skin Type:** Sensitive and rosacea skin.

Domiciliary products for Sensitive Skin and Rosacea

Hydro-noursishing Cream

- **Key Active Ingredients:** Wheat Germ, Avocado and Almond Oils, Aloe Vera, Collagen, Glycerol, Alpha-Bisabolol and Moringa Lipids.
- **Mechanism of Action:** Day and night cream that restores hydration levels and elasticity in dry or devitalized skin, with emollient, soothing, and barrier-protective action.
- **Clinical Indications:**
  - Dry/dehydrated skin due to age, climate, medication, or treatments.
  - Hydration base in anti-aging, pigmentation, and mild rosacea protocols (when rehydration is the priority).
- **Skin Type:** normal to dry or sensitive skin.
- 30+ SPF and tinted version available.

Sensitive Skin and Rosacea Cabin Protocol

Results obtained through Visia analysis.

- **Cabin treatment:** 2 sessions every 15 days with Lactic Cleansing Solution.
- **Home Use:** Rosanic + Ferulast for 60 days (day and night).

Sensitive Skin Products

Our Dermal Recovery Products are suitable for sensitive skin.

- Rosanic Cream
- Hydro-nourishing Cream (SPF and colour)
- Sensitive Cleanser
- Refresh Toner
- Ferulast
- Restoring Cream
- Aloe Vera Gel 200%
- Musk Rose Oil
- Arni-K Vita Cream
